

DAFO FlexiSport

Strong plantarflexion resist, dorsiflexion resist

This custom-fabricated, two-part orthosis combines wrap-around foot control with a semi-flexible posterior upright, providing graded resistance to plantarflexion/dorsiflexion.

Key Features

Custom fabricated from cast

Fully integrated padding

Posterior strut flexibility

allows smooth and repeated flexing without breakage—choose moderately flexible or semi-rigid.

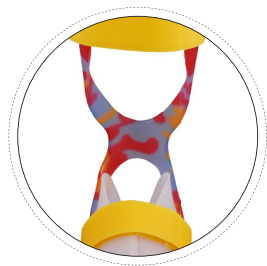

Thin polyethylene inner liner

for flexible control of foot position and alignment. Sleek design for good shoe fit. Our Softy® foam or OP Flex liner are available as alternatives to the polyethylene.

Defined plantar surface contours

Designed for patients who:

- Need foot alignment support and moderate-to-strong ankle control to resist plantarflexion or dorsiflexion.

Standard option
Moderately flexible posterior strut

Alternate option
Semi-rigid posterior strut
